Dear Valued Customer,

Hayward Industrial Products, Inc. is pleased to announce that we have entered into an exclusive partnership with Energy Steel & Supply Company to supply nuclear and safety related pipeline strainer replacement parts and units to the nuclear power industry.

Hayward Industrial Products, Inc., as the successor to the Fluid Handling Division of Zurn Industries, has many automatic self-cleaning and manual simplex and duplex style strainers installed in nuclear power generating facilities throughout North America and the world.

Energy Steel is uniquely positioned to combine their more than twenty years of nuclear power related experience with Hayward's line of separation products to provide qualified replacement parts and units. Energy Steel maintains an approved ASME Section III Quality Assurance program complete with "N" Stamp capability to support their efforts.

Hayward's reputation for quality, efficient separation products is known worldwide. These products are used virtually everywhere in a power plant where a liquid is being pumped.

Requests for information and quotations can be directed to:
